2. ABERDEEN'S MAIN PLANNING ISSUES

Feel free to continue on separate sheets if necessary and attach to the questionnaire. You do not have to answer every question.

Vision

2.1 What do you think are the most important things that make Aberdeen a good place to live, visit and/or work?

Beach, green spaces and accessibility to countryside

2.2 What do you think should be the Council's top priorities for the next Aberdeen Local Development Plan?

Infrastructure and low cost housing

2.3 Do you have any particular aspirations for your community or Aberdeen as a whole that you think should be taken forward through the ALDP? For example, what are your views on recycling of waste, affordable housing, access to green space or ways to reduce CO₂ emissions?

ACC have made large inroads into recycling. We have good access to green space. Hopefully WPR will reduce amount traffic through city and in turn, reduce CO₂ emissions. Need more affordable housing and less private house building

Policy Topic Areas

What do you think should be our main planning priorities for...

- 2.4 ...the City Centre? (For example, what should the role of Union Street be? Does the City Centre have all the uses we want, or should there be more uses there - and if so where could they go?)

Encourage shops to Union Street rather than shopping centres

- 2.5 ...providing infrastructure? (For example, how should new infrastructure be provided and how might it be paid for?)

New infrastructure should be paid for by developers + First Bus should contribute instead of ACC paying for their bus lanes, stops and shelters

- 2.6 ...transport and accessibility? (For example, how can we make it easier to travel in and around Aberdeen? Should we look at pedestrianisation in the City Centre?)

Encourage a second company to provide bus service as First Bus have monopoly. We do not have alternative roads to cope with traffic should City Centre be pedestrianised

- 2.7 ...ensuring we have high quality buildings and places? (For example, how can we better protect our built heritage and ensure high quality and sympathetic architecture and landscape design?)

By making use of our granite buildings by change of use, rather than knocking them down. Insides could be redeveloped for businesses or homes

- 2.8 ...meeting the needs of business and industry? (For example, what can be done to retain existing businesses and attract new employment opportunities to Aberdeen?)

8 Review business rates and be flexible

- 2.9 ...meeting Aberdeen's housing and community needs? (For example, how can we meet the needs of people who cannot afford mainstream housing?)

More affordable housing and re-use of empty buildings to provide housing

2.10 ...supporting retail centres across Aberdeen? (For example, should we be safeguarding existing centres, and what are your thoughts on new out-of-town retail parks?)

New out of town retail parks are only accessible if you have a car. Public transport would need to improve drastically

2.12 ...ensuring that resources and waste are managed sustainably? (For example, can we make more innovative use of waste as a resource? Should we encourage renewable energy use? How could we do these things?)

Education of consumers and business re waste. Look at other areas / companies that use recyclable products to produce new items.

2.11 ...protecting and enhancing the natural environment and preventing flooding? (For example, what areas or features should we be safeguarding?)

Green space in town needs to be protected. Mouth of River Don needs to be looked at as possible flooding danger

2.13 If you have any views on topics not covered above, please write them below.
